MESSAGE OF THE GOVERNOR

*Mr. President, Mr. Speaker, and
Members of the General Assembly:*

The cause of your summons for this Special Session, when the Regular Session is so near, is no doubt fully understood by each of you. Yet it is both proper and necessary that I make some brief explanation by way of preface to my recommendations.

For some time the subject of unemployment compensation insurance has engaged public attention and challenged legislative consideration. Our North Carolina General Assembly of 1933, meeting in the very depths of the depression, gave consideration to it and passed a resolution directing the appointment by the Governor of a Commission to study and report on the problem. Pursuant to that resolution a Commission was appointed, and with funds provided through a Federal Project, initiated and sponsored by me, set about its task of study under the very competent chairmanship and direction of Senator Burgin of Davidson County, who had introduced its authorizing resolution. This study and accompanying bill and data was placed by me at the disposal of the General Assembly of 1935 with my approval and a recommendation which it seems proper here to quote as follows:

"I am convinced that this General Assembly should take definite action to provide in North Carolina such insurance and that its action should be in line with the Federal proposals and Congressional enactments on this subject. We have not as yet full information as to what Congressional action will be, but our State must put itself in line to provide for, as well as escape from, the penalties of such legislation.

"Besides, as I have previously indicated, this is an advance in social legislation which our State should not fail to take as a matter of humanity and sensible provision against future industrial calamities."

This message was delivered on January 10, 1935. Our General Assembly remained in session until May but, at the closing date, Congress had

not yet acted, and so an emergency measure was drawn in the Governor's office and introduced in the House at his request by the Honorable R. Gregg Cherry, your justly distinguished Speaker. It passed both Houses on May 11, the last day of their session, and is recorded as Chapter 492 of the Public Laws of 1935. Immediately after the close of this session copies of this Act were sent to our United States Senators and Congressmen in a letter requesting their assistance in protecting us against the necessity for a Special Session.

It was not until the following August that Congressional action was completed and the Social Security Act—including this feature—became a Federal law. Appropriation for its functioning, however, failed of passage at this Congressional Session and was not finally enacted until the next regular Session of Congress in January of this year.

Promptly thereafter, your Governor sought to obtain approval of the Federal Bureau for a set-up in North Carolina under the Cherry Act. Though this request has been vigorously, earnestly, and repeatedly urged, both by the Governor and the Attorney-General, we have been unable to secure the Board's approval for such a set-up. The Cherry Act did not levy a tax. It could not do so, for at the time of its passage we did not know what tax, if any, would be required or even the exact form that final Congressional action (which did not occur until months later) would assume. It provided, however, for the receipt of "contributions" for maintenance of the activity and for the promulgation of rules and regulations governing participation. In this connection, it is interesting to note that the Federal Act also uses this very word "contribution" which word, in derivation certainly, has a meaning quite contrary to that of the word "tribute," which is synonymous with "tax." But since the Federal Act defines the word "contribution" as used therein as a payment "required" to be made, the bureau insists that this provision can be satisfied only by a State imposed "tax." Nor does it agree with our contention that the terms of this Federal provision would be satisfied by rules which made "contribution" by an industry a prerequisite to participation of its employees. Such an interpretation, it seems to us, would be not only reasonable but also in keeping with the language and the spirit of the Federal Act and would promote, rather than retard, the Congressional purpose manifested in its passage and aid in accomplishing a nation-wide acceptance of what was evidently envisioned as a nation-wide enterprise. Indeed, such a construction would furnish the only possible means for the participation of those states—and there a number of them—whose constitutions forbid the imposition of a tax of this character unless these States can set up machinery for an activity financed by "contributions," their citizens will be taxed by the Federal Government for an enterprise in which they cannot possibly cooperate because of their own fundamental law.

All this is set down not in criticism of any, but simply by way of showing that your Executive not only constantly advocated such insurance but also has earnestly endeavored to avoid the burden of this Special Session and to set up such an activity in accord with our existing laws. In common with our able Attorney General, I believe these sufficient. However, the

steadfastly maintained attitude of the Security Board and the last minute rush of so many States to enact legislation and accomplish a set-up in form approved by it before January first, have created a situation of such precariousness that I felt constrained to issue the call which brings you here.

Lest our citizens be faced with the danger of losing through the Bureau's ruling a substantial sum paid for an enterprise which their Governor and Legislature have both approved and to the end that there may be no slightest foundation for suggesting that North Carolina or her officials have failed to do all and everything necessary for participation in this worthy enterprise, I have summoned you to this Extra Session and do now recommend the speedy adoption of a measure carefully prepared and which I am assured is federally approved. Controversial questions have been avoided in its drafting. The administrative set-up is along lines approved by my successor, in whose term, largely, it will develop its functioning. With the enactment of this measure all doubt of our right to participate will be dispelled. The only hand that presently stays our start upon the highway which we seek to travel or threatens to withhold the funds we feel are rightly ours, is the hand that levied the taxes of which they are a part. The act, copy of which is attached hereto, should remove this danger. I trust it may be quickly passed.

The nearness of your Regular Session and my unwillingness to trespass unduly either upon your time or the prerogatives of my successor, suggest the inadvisability of my making now any further recommendations. Permit me, however, to welcome you and voice my complete confidence in your ability and disposition well and truly to perform the duties which have been placed upon you.

The address having been delivered, on motion of Senator Johnston, the Joint Assembly adjourns.

The Senate repairs to its Chamber and the House resumes consideration of its business.

20. No member shall vote on any question when he was not present when the question was put by the Speaker, except by the consent of the House. Upon a division and count of the House on any question, no member without the bar shall be counted.

21. Every member who shall be in the hall of the House for the above purpose when the question is put shall give his vote upon a call of the ayes and noes, unless the House for special reasons shall excuse him, and no application to be excused from voting or to explain a vote shall be entertained unless made before the call of the roll. The hall of the House shall include the lobbies and offices connected with the hall.

22. When a motion is made it shall be stated by the Speaker, or if written, it shall be handed to the Chair and read aloud by the Speaker or Clerk before debate. A motion to table or adjourn shall be seconded before the motion is put by the Speaker to the vote of the House.

23. Every motion shall be reduced to writing, if the Speaker or any two members request it.

24. After a motion is stated by the Speaker or read by the Clerk, it shall be deemed to be in possession of the House, but may be withdrawn

before a decision or amendment, except in case of a motion to reconsider, which motion, when made by a member, shall be deemed and taken to be in possession of the House, and shall not be withdrawn without leave of the House.

25. When a question is under debate no motion shall be received but to adjourn, to lay on the table, to postpone indefinitely, to postpone to a day certain, to commit or amend, which several motions shall have precedence in the order in which they stand arranged; and no motion to lay on the table, to postpone indefinitely, to postpone to a day certain, to commit or amend, being decided, shall be again allowed at the same stage of the bill or proposition.

26. A motion to adjourn or lay on the table shall be decided without debate, and a motion to adjourn shall always be in order, except when the House is voting or some member is speaking; but a motion to adjourn shall not follow a motion to adjourn until debate or some other business of the House has intervened.

26a. In case of adjournment without any hour being named, the House shall reconvene on the next legislative day at twelve o'clock noon.

27. When a question has been postponed indefinitely, the same shall not be acted on again during the session, except upon a two-thirds vote.

28. Any member may call for a division of the question, when the same shall admit of it, which shall be determined by the Speaker.

29. When a motion has been once made and carried in the affirmative or negative, it shall be in order for any member of the majority to move for the reconsideration thereof, on the same or succeeding day, unless it may have subsequently passed the Senate, and no motion to reconsider shall be taken from the table except by a two-thirds vote. But unless such vote has been taken by a call of the yeas and nays, any member may move to reconsider.

30. When the reading of a paper is called for, which has been read in the House, and the same is objected to by any member, it shall be determined by a vote of the House.

31. Petitions, memorials, and other papers addressed to the House shall be presented by the Speaker; a brief statement of the contents thereof may be verbally made by the introducer before reference to a committee, but shall not be debated or decided on the day of their first being read, unless the House shall direct otherwise.

32. When the ayes and noes are called for on any question, it shall be on motion before the question is put; and if seconded by one-fifth of the members present, the question shall be decided by the ayes and noes; and in taking the ayes and noes, or on a call of the House, the names of the members will be taken alphabetically.

33. Decency of speech shall be observed and personal reflection carefully avoided.

34. Any member may arise at any time to speak to a question of personal privilege, and upon objection to him proceeding, the Speaker shall determine if the question is one of privilege.

35. Fifteen members, including the Speaker, shall be authorized to compel the attendance of absent members. A quorum shall consist of a majority of the qualified members of the House.

36. No member or officer of the House shall absent himself from the service of the House without leave, unless from sickness or inability.

37. Any member may excuse himself from serving on any committee if he is a member of two standing committees.

38. If any member shall be necessarily absent on temporary business of the House when a vote is taken upon any question, upon entering the House he shall be permitted, on request, to vote, provided that the result shall not be thereby affected.

39. No standing rule or order shall be rescinded or altered without one day's notice given on the motion thereof, and to sustain such motion two-thirds of the House shall be required.

40. The members of the House shall uncover their heads upon entering the House while it is in session, and shall continue so uncovered during their continuance in the hall, except Quakers.

41. A motion to reconsider shall be determined by a majority vote, except a motion to reconsider an indefinite postponement, or a motion to reconsider a motion tabling a motion to reconsider, which shall require a two-thirds vote.

42. After a bill has been tabled or has failed to pass on any of its readings, the contents of such bill or the principal provisions of its subject-matter shall not be embodied in any other measure. Upon the point of order being raised and sustained by the Chair, such measure shall be laid upon the table, and shall not be taken therefrom except by a vote of two-thirds of the elected membership of the House: *Provided*, no local bill shall be held by the Chair as embodying the provisions or being identical with any State-wide measure which has been laid upon the table, or failed to pass any of its readings.

42a. A motion to table an amendment sent up from the floor shall not be construed as a motion to table the principal bill or any other amendment which has been offered thereto, and if such motion is carried, only the amendment shall lie upon the table.

42b. When a member desires to interrupt a member having the floor he shall first obtain recognition by the Chair and permission of the member occupying the floor, and when so recognized and such permission is obtained, he may propound a question to the member occupying the floor, but he shall not propound a series of questions or interrogatories or otherwise interrupt the member having the floor; and the Speaker shall, without the point of order being raised, enforce this rule.

In considering matters in difference between

the House and Senate committed to the conferees, only such matters as are in difference between the two houses shall be considered by the conferees, and the conference report shall deal only with such matters. The conference report shall not be amended. Except as herein set out, the rules of the House of Representatives of Congress shall govern the appointment, conduct, and reports of the conferees.

44. In forming a Committee of the Whole House, the Speaker shall leave the Chair, and a Chairman to preside in committee shall be appointed by the Speaker.

45. Upon bills submitted to a Committee of the Whole House, the bill shall be first read throughout by the Clerk, and then again read and debated by sections, leaving the preamble to be last considered. The body of the bill shall not be defaced or interlined, but all amendments, noting the page and line, shall be duly entered by the Clerk on a separate paper as the same shall be agreed to by the committee, and so reported to the House. After report, the bill shall again be subject to be debated and amended by sections before a question on its passage be taken.

46. The rules of procedure in the House shall be observed in a Committee of the Whole House, so far as they may be applicable, except the rule limiting the time of speaking and the previous question.

47. In a Committee of the Whole House a motion that the committee rise shall always be in order, except when a member is speaking, and shall be decided without debate.

48. Every bill shall be introduced by motion for suspension of the rules, or by order of the House, or on the report of a committee, unless introduced in regular order during the morning hour.

49. All bills and resolutions shall be reported from the committee to which referred, with such recommendations as the Committee may desire to make.

50. Every bill shall receive three separate readings in the House previous to its passage, and the Speaker shall give notice at each whether it be its first, second, or third reading.

51. Any member introducing a bill or resolution shall briefly endorse thereon the substance of the same.

52. All bills and resolutions shall upon their introduction be referred by the Speaker, without suggestion from the introducer, to the appropriate committee. No bills shall be withdrawn from the committee to which referred except upon motion duly made and carried by a majority vote.

53. The Clerk of the House shall keep a separate calendar of the public, local, and private bills, and shall number them in the order in which they are introduced, and all bills shall be disposed of in the order they stand upon the Calendar; but the Committee on Rules may at any time arrange the order of precedence in which bills may be considered. No bill shall be twice read on the same day without the concurrence of two-thirds of the members.

54. All resolutions which may grant money out of the Treasury, or such as shall be of public nature, shall be treated in all respects in a similar manner with public bills.

55. The Clerk of the House shall be deemed to continue in office until another is appointed.

56. Those for whom no excuse or sufficient excuses are made may, by order of those present, if fifteen in number, be taken into custody as they appear, or may be sent for and taken into custody wherever to be found by special messenger appointed for that purpose.

Previous Question

57. The previous question shall be as follows: "Shall the main question be now put?" and, until it is decided, shall preclude all amendments and debate. If this question shall be decided in the affirmative, the "main question" shall be on the passage of the bill, resolution, or other matter under consideration; but when amendments are pending, the question shall be taken upon such amendments, in inverse order, without further debate or amendment. If such question be decided in the negative, the main question shall be considered as remaining under debate: *Provided*, that no one shall move the previous question except the member submitting the report on the bill or other matter under consideration, and the member introducing the bill or other matter under consideration, or the member in charge of the measure, who shall be designated by the chairman of the committee reporting the same to the House at the time the bill or other matter under consideration is reported to the House or taken up for consideration.

When a motion for the previous question is made, and pending the second thereto by a majority, debate shall cease; but if any member obtains the floor, he may move to lay the matter under consideration on the table, or move an adjournment, and when both or either of these motions are pending the question shall stand:

- (1) Previous question.
- (2) To Adjourn.
- (3) To lay on the table.

And then upon the main question, or amendments, or the motion to postpone indefinitely, postpone to a day certain, to commit, or amend, in the order of their precedence, until the main question is reached or disposed of; but after the previous question has been called by a majority, no motion, or amendment, or debate shall be in order.

All motions below the motions to lay on the table must be made prior to a motion for the previous question; but, pending and not after the second therefor, by the majority of the House, a motion to adjourn or lay on the table, or both, are in order. This constitutes the precedence of the motions to adjourn and lay on the table over other motions, in Rule 25.

Motions stand as follows in order of precedence in Rule 26:

Previous question.

Adjourn.

Lay on the table.

Postpone definitely.

To commit or amend.

When the previous question is called, all motions below it fall, unless made prior to the call, and all motions above it fall after its second by a majority required. Pending the second, the motions to adjourn and lay on the table are in order, but not after a second. When in order and every motion is before the House, the question stands as follows:

Previous question.

Adjourn.

Lay on the table.

Postpone indefinitely.

Postpone definitely.

To commit.

Amendment to amendment.

Amendment.

Substitute.

Bill.

The previous question covers all other motions when seconded by a majority of the House, and proceeds by regular graduation to the main question, without debate, amendment, or motion, until such question is reached or disposed of.

58. All committees, other than the Committee on Appropriations, when favorably reporting any bill which carries an appropriation from the State, shall indicate same in the report, and said bill shall be re-referred to the Committee on Appropriations for a further report before being acted upon by the House. All committees, other than the Committee on Finance, when favorably reporting any bill which in any way or manner raises revenue or levies a tax or authorizes the issue of bonds or notes, whether public, public-local, or private, shall indicate same in the report, and said bill shall be re-referred to the Committee on Finance for a further report before being acted upon by the House.

59. The Principal Clerk, the Engrossing Clerk, and the Sergeant-at-Arms may appoint, with the approval of the Speaker, such assistants as may be necessary to the efficient discharge of the duties of their various offices, and one or more of whom may be assigned by the Speaker from the Engrossing Clerk's office to the office of the Legislative Reference Librarian for the purpose of drafting bills.

60. The Speaker may appoint a Clerk to the Speaker, and he may also appoint ten pages to wait upon the sessions of the House, and when the pressure of business may require, he may appoint five additional pages.

61. The Chairman of each of the following committees: Appropriations, Counties, Cities and Towns, Education, Finance, and Roads, may each appoint a clerk to the said committees; and the Chairmen of Judiciary Committee No. 1 and of Judiciary Committee No. 2 may jointly appoint a clerk to serve both of said committees; and the Chairmen of Agriculture and Banks and Banking may jointly appoint a clerk to serve both of said committees; and the Chairmen of Propositions and Grievances and Insurance may jointly appoint a clerk to serve both of said committees; and the Chairmen of Salaries and Fees and Courts and Judicial Districts may jointly appoint a clerk to serve both of said committees. All committee clerks heretofore provided for are to be appointed by and with the approval

of the Speaker. All committee clerks after being named as provided by this rule shall be subject to assignments by the Chairman of the Rules Committee when they are not engaged with the committee or committees to which they have been regularly assigned.

62. That no clerk, laborer, or other person employed or appointed under Rules 59, 60, and 61 hereof shall receive during such employment, appointment, or service any compensation from any other department of the State Government, or from any other source, and there shall not be voted, paid, or awarded any additional pay, bonus or gratuity to any of them, but said persons shall receive only the pay for such duties and services as now provided by law. When the House is not in session the pages shall be under the supervision of the Principal Clerk.

63. The chairman and five other members of any committee shall constitute a quorum of said committee for the transaction of business.

64. The Committee on the Journal shall examine daily the Journal of the House before the hour of convening, and report after the opening of the House whether or not the proceedings of the previous day have been correctly recorded.

65. When a bill shall be reported by a committee with a recommendation that it be not passed, but accompanied by a minority report, the question before the House shall be "The adoption of the minority report," and it failing to be adopted by a majority vote, the bill shall be placed upon the unfavorable calendar. Such minority report shall be signed by at least three members of the committee who were present when the bill was considered in committee: *Provided, however*, that where a minority report is filed the proponents and opponents of the question presented thereby shall be allowed not to exceed ten minutes on each side to explain the question: *Provided further*, that by a majority vote the time may be extended for a discussion of the minority report and on the merits of the bill. In the event there is an unfavorable report with no minority report accompanying it, the bill shall be placed upon the unfavorable calendar. To take a bill from the unfavorable calendar, a two-thirds vote shall be necessary.

65a. A bill from the unfavorable calendar shall not be debatable, but the movant may make a brief and concise statement of the reasons for the motion before making the motion, taking not more than five minutes.

66. Whenever a public bill is introduced a carbon copy thereof shall accompany the bill. The Reading Clerk shall stamp the copy with the number stamped upon the original bill. Such copy shall be daily delivered to the joint committee hereinafter provided for. The Principal Clerk shall deliver the carbon copy of the bills designated to be printed, as hereinafter provided for, to the Public Printer and cause four hundred copies thereof to be printed. On the morning following the delivery of the printed copies the Chief Clerk shall cause the chief page to have one copy thereof put upon the desk of each member and shall retain the other printed copies in his office. A sufficient number of the printed copies for the use of the committee to which the bill is referred shall be by the chief page delivered to the chairman or clerk of that committee. If the bill is passed, the remaining copies shall be by the chief page delivered to the Principal Clerk of the

Senate for the use of the Senate. The cost of printing shall be paid from the contingent fund of the House of Representatives. The Chairman of the Rules Committee of the House and the Chairman of the Rules Committee of the Senate shall appoint a sub-committee consisting of two members of the House and two members of the Senate from the body of the House and Senate, and such chairmen shall notify the Principal Clerk of the House and of the Senate who has been so appointed. Such sub-committee shall meet daily and examine the carbon copies of the public bills introduced and determine which of such public bills shall be printed and which shall not, and stamp the copies accordingly. Such sub-committee shall serve for one week unless for good cause the chairmen of the respective rules committees shall determine otherwise. If the member introducing a public bill, which the committee shall determine should not be printed, so desires, he may appear before the committee at the next meeting thereof with reference thereto.

67. Whenever any resolution or bill is introduced a carbon copy thereof shall be attached thereto, and the Principal Clerk shall cause said carbon copy to be numbered as the original resolution or bill is numbered, and shall cause the same to be available at all times to the member introducing the same. In case the resolution or bill is a public resolution or bill, an additional carbon copy shall also be attached thereto for the use of the Public Printer, under the provisions of Rule 66.

MESSAGE FROM THE GOVERNOR

A message is received from the Governor, transmitting the budget, which message is ordered spread upon the Journal, and a copy thereof is referred to the Committee on Finance.

BUDGET MESSAGE

OF

GOVERNOR CLYDE R. HOEY

TO THE

GENERAL ASSEMBLY OF NORTH CAROLINA

Mr. President, Mr. Speaker, and Members of the General Assembly:

In accordance with the provisions of Executive Budget Act, Chapter 100, Public Laws 1929, I have the honor to transmit to you the Budget,

the Appropriations Bill, and the Budget Revenue Bill, which contain the proposals made by the Budget Commission.

These bills will furnish a basis upon which you can proceed with the consideration of the matters of appropriations and revenue. I need not emphasize their importance and you fully realize the necessity of giving careful study to these perplexing problems. Of course you realize that the bills which I present to you are not the work of the present administration.

The Budget Commission is composed of men of high intelligence and broad experience and they have diligently considered these problems and prepared their recommendations with great detail. I wish to commend them for the intelligent and painstaking consideration which they have given to the subject of raising revenue by legislation and expending it in the form of appropriations. Their report deserves your full and thoughtful consideration and each member of the Commission is entitled to our thanks and appreciation.

The bills which I present to you represent the best thought of the Commission. In the brief space of time which has elapsed since these bills came into my hands I have not had the opportunity to study the measures and am not prepared to advise you as to my own thought concerning all the provisions which they contain. However, instead of delaying the presentation to you of these measures, while I gave consideration to them, I am transmitting them to you now in the hope that you will begin at once your study and consideration. I reserve the right to communicate with you further upon these proposals and to approve or oppose any of the provisions if I should deem such course advisable after full investigation.

One important matter should be realized by all: that is, as conditions improve it will be impossible to secure the same objectives at the same cost, but these improved conditions which we truly hope for and believe to be actual should not be the basis for increasing the burdens not reasonably and fairly justified.

In making this transmittal to you I think it is proper for me to say that in my opinion the budget system is the only one by which we can control our governmental operations and safeguard the credit of the State to the extent required by orderly, efficient, and economical government. Business and government require this system and past experiences fully justify its continuance. In such a system mistakes and extravagances make their appearances in such detail that corrective measures can be more quickly found and the proper remedies applied.

You will discover from an examination of the Budget Report that no provision is made to cover some of the necessary expenditures that will have to be made by the State during the next biennium: chief among the number being old age assistance. Since this legislation has not yet been enacted the Budget Commission made no provision for such expenditures as might arise following its enactment. This applies to other measures which you may see fit to adopt and which are not covered by any appropriation in the Budget Report. This will necessitate additional provision

being made for revenues to meet any additional expenditures which you may authorize.

I deem it important to say to you in this connection that it is imperative that our revenue shall equal our appropriations. I sincerely hope and believe that we entirely agree upon this uncompromising principle. We should always be mindful of the surety of our revenues and adopt sources of reality and not make expenditures supported only by mythical estimates.

I am confident that you will meet these problems with fairness, honesty and courage and that you will apply your fine intelligence to working out the best possible solution of these vexing problems. I assure you of my full and hearty cooperation at all times and will be pleased to consult with you individually or collectively as you proceed to the discharge of the important duties which devolve upon you in connection with these measures of grave public concern.

Respectfully submitted,

CLYDE R. HOEY.

*Governor and ex-officio
Director of the Budget*

January 12, 1937.

The following member votes present: Mr. Kimzey.

STATEMENT BY MEMBER

I desire to have an explanation of my vote in opposition to House Bill No. 46 set forth in the record to the effect that my personal opposition to the bill is predicated upon the fact that the bill does not provide any machinery for legal control of liquor in the event the referendum favors legalization, in which case it is apparent that it would be necessary to have an Extraordinary Session of the Legislature to enact such control measures. Further that the bill repeals the law legalizing the sale of beer and light wine, from which the State received approximately a million dollars in revenue during the past year.

I have no objection to allowing the people to express their views on liquor; and to the contrary, I am in favor of submission of the question to the people affected before placing any laws into effect relating to liquor. I further oppose the Bill for if the so-called drys should lose the State referendum the result would be tantamount to forcing liquor stores in counties, whether they wanted them or not.

JOHN W. CAFFEY.

It was my intention to submit an amendment to the Substitute to H. B. 55, because it leaves the matter in the discretion of the County Commission-

If this bill passes, I reserve the right, should our County Commissioners refuse to agree to call for a referendum in Wake County, to present a separate bill allowing a vote of the people on this matter in Wake County.

I vote "present."

STATEMENT BY MEMBER

Mr. Speaker:

Explaining my vote on the second reading of the Revenue Bill:

On yesterday I offered an amendment to strike out subsection (f) of Section 122 and subsection (a) of Section 155 of the Committee Substitute Bill. In offering those amendments I contended that a large number of people in the State were at disagreement with those subsections in two respects. First, on the general principal that a sales tax levy of 3% ought not to be extended to wholesale purchases of materials for processing into building construction no matter by whom purchased nor where used. Secondly, that the two subsections as now set up in the Revenue Bill constitute a definite and discriminatory levy on a restricted group of citizens and is not general and equitably to be applied.

I conceive that the House in rejecting my amendment to strike out these subsections intended to overrule me, in the House, on my contention that three per cent license to use building materials in the State ought not to be applied as the settled policy of the State. I do not believe that the House intended to apply a discriminatory levy on a small group of citizens in the State. The Department of Revenue agrees with us, now, that the bill, as written, does include and permits and requires such discriminatory levy. The Department has agreed, in view of the discriminatory incidence of the tax, as now set up in the bill, that, before

the bill goes on the first reading in the Senate, the Department will offer and promote such changes as will require reasonable uniformity of application and practical absence of discrimination to the end that all users of building materials in North Carolina shall be, alike, chargeable with the same tax.

It is understood fully that those in agreement with my position reserve the right and fully intend to resist the passage, in the Senate, of a measure intended and calculated to extend the three per cent so-called sales tax levy to include all and every of building materials to be used in North Carolina. In view of the above set forth parliamentary status of this matter I vote on the second reading "aye."

February 11, 1937.

J. C. Hobbs.

STATEMENTS BY MEMBERS

February 13, 1937

Mr. Speaker:

I am voting "NO" on the revenue bill for three reasons:

First. This revenue bill makes no honest effort to fulfill the Democratic Party pledge to take the sales tax off the necessities of life. I am unalterably opposed to this vicious and unjust tax on the living of the poor of North Carolina, and I think the revenue bill should reveal at least an honest effort to reduce the burden of the sales tax and get more money from sources able to pay.

Second. The people of the State by an overwhelming majority in November voted in favor of increasing the income tax, which is the fairest tax known. Yet this mandate of the people has to all practical purposes been flouted by this revenue bill.

Third. I am voting against this bill because it provides for diverting more than \$2,000,000 from the gasoline tax at a time when the roads of the State, especially the secondary roads, are in a deplorable condition and need every possible resource available in the highway funds for their repair and improvement.

Virgil A. Wilson.

February 13, 1937

Mr. Speaker:

It was my hope that this General Assembly could at least cut the sales tax to two per cent. I realize that we must have more funds with which to operate our State and increase the appropriations for schools and raise the low salaries paid our teachers.

I reluctantly vote for any sales tax, but owing to the exemptions of a "few" necessities of life, I vote "aye".

Clarence E. Mitchell.

February 13, 1937

Mr. Speaker:

Approving of some parts of House Bill 35, and not approving of Article 5, Section E, known as the sales tax section, I will therefore have to vote "no".

H. L. Joyner.

February 13, 1937

Mr. Speaker:

I am in favor of a great portion of the revenue bill, but I am forced to vote against it for the following reasons:

(1) I am against the sales tax in its entirety.

(2) I am against the revenue bill because it provides a maximum tax of \$15.00 on a high priced automobile and does not have a limit when it comes to building contractors.

Claude C. Abernathy

February 13, 1937

Mr. Speaker:

I am voting "no" on the revenue bill for the following reasons:

I was elected a member of the House of Representatives from my County with the distinct understanding that I would vote against the sales tax. This bill contains many sales tax proposals that will redound to the hardship of the citizens of my County. Its provisions do not carry out the mandate of the Democratic Party platform, which pledges "all necessities of life" will be exempt from sales tax. This House has gone even further and levied a three per cent sales tax on building materials, which will tend to retard recovery and prevent many deserving citizens from building homes and engaging in other construction projects.

Further, on this all-important measure, I took oath to endeavor to conscientiously represent the citizens of my County, and that is what I am trying to do.

Ed R. Hanford.

On motion of Mr. Johnston of Fredell, the House adjourns, and will meet Monday Night at eight o'clock, P. M.

STATEMENT BY MEMBER

I am voting "No" on the Revenue Bill—because:

1st. The Revenue Bill does not fulfill the pledge in the Democratic platform to remove the sales tax from the necessities of life.

2nd. The revenue secured from the sales tax can be gotten by taxes on incomes, inheritances, franchises on power and bus companies and other sources of wealth, which proposals I introduced and supported in lieu of the sales tax.

3rd. The people of our State have voted overwhelmingly to increase the income tax limit, and this should be reasonably and substantially complied with before resorting to the sales tax.

4th. Liquor has been made legal with the tax thereon too small to correct its damages and provide needed revenue for the State and if we

are to have liquor the tax thereon should be sufficient to help supplant the sales tax and materially contribute toward social securities cost.

5th. The Revenue Bill provides for diverting about **FOUR MILLION DOLLARS** from the gasoline tax which I consider a "special tax" levied for a "special purpose" at a time when rural roads need every possible resource available in the highway funds for repair and improvements.

6th. This bill will make it necessary for the County Commissioners of our county to levy a larger tax on the land and homes of our people. I am firmly opposed to the State shifting its burdens to the farms and homes through the several counties.

7th. This whole bill is written with more regard for protection of wealth than for protection and convenience of the masses of our people, and to this I am unalterably opposed.

I have a very high regard for those members of this body who have worked on the Revenue Bill.

My conviction, Mr. Speaker, is not susceptible of compromise for political expediency or for any other reason, I therefore vote "No."

D. LACY MCBRYDE.

STATEMENT BY MEMBER

March 12, 1937.

Mr. Speaker:

On second and third readings of the Omnibus Bill I dismissed myself from the Hall of the House and did not vote. I understood at that time, that my brother's name had been mentioned as successor to the Assistant County Superintendent about a year ago during a shake up in the Court house.

I did not vote then as I thought that it might be said that I voted a prejudice vote. I understand now that it is rumored over the county that my brother is in line for office of County Superintendent.

I want to be recorded as voting "No" on this bill in order to dispell any idea of previous knowledge of such a movement either by my brother or myself.

STATEMENTS BY MEMBER

H. B. 35: This revenue bill, which passed on February 27th is unfair, it is contrary to the Democratic platform, and it is a repudiation of the expressed will of the people.

The Democratic Party solemnly pledged to the people of North Carolina that the sales tax would be removed from all necessities of life. Under this revenue bill the pledge of the party is ignored. The Committee and Budget Bureau leaders evidently have not even tried to fulfill the platform; they have scorned it. As a further insult to the Party and injury to the people, the sales tax has been put on building materials, so that from now on a farmer or working man will even have to pay sales tax on his home.

While making the average man's burden harder and harder, the revenue bill lets the fabulously wealthy corporations—the big tobacco companies and the power companies—get by without a penny of additional taxes to help take care of the increased duty of government.

In November the people voted by a huge majority to increase the income tax, but again on this point wealth is victorious over the will of the people. Corporation income tax is not increased one cent, even though we have corporations making thirty million dollars a year net profit. There is no real increase in the rate of the individual income tax on large incomes, some of which run up to and over a million dollars in the State.

I am against this bill for another reason. This bill does not provide the necessary revenue to take care of social security. They are planning to put this tax right back on land, the worst place in the world to go to get any more taxes. I am not going to be a party to any tax bill which puts tax on land and on the necessities of life and let the wealth of the State escape.

As if to make the bill even worse, it robs the highway fund of \$4,200,000 just at a time when the roads of the State are so terrible that farmers cannot even get to market and schools have to stay closed because the busses cannot pass over the secondary roads.

I wish there were a reasonable revenue bill to vote for, but this is too outrageous.

If I were to vote for this unjust and destructive bill, I would not have the nerve to face the people who chose me to represent them. My vote is No.

TROY T. BARNES.

H. B. 280: This bill is the first step in North Carolina in the direction of helping labor, and while the amendments engrafted on the bill have largely nullified the beneficent effects that would otherwise have prevailed, I must vote for the bill, because I feel that it is better than nothing. However, I did everything in my power to defeat some of these objectionable amendments, and I know that it would have been far better had they been defeated.

I vote for the bill with the hope that the next General Assembly of North Carolina will take up where we have left off, and do full justice to labor in North Carolina. I vote "aye."

TROY T. BARNES.

H. B. 468: When H. B. 468 was introduced in the House, it was obvious that its purpose was to enable municipalities to carry electricity in reach of the rural people of North Carolina. It was a good bill, and I was heartily in favor of it and did everything in my power to secure its passage.

The power companies made every effort in this House to engraft an amendment on this bill which would place the municipalities of North Carolina at the mercy of the power companies. We fought this amendment and defeated it on the floor of this House. This bill went to the Senate, and the power companies succeeded in engrafting this objectionable amendment on this bill. The Conferees on the part of the House and Senate saw fit to permit this objectionable amendment to remain in the bill.

Those in authority in Washington have advised us that it would be better to kill the entire bill than to take it with an amendment that would leave us at the mercy of the power companies of North Carolina. I therefore vote "no" to the passage of this bill.

TROY T. BARNES.

S. B. 58: I came to Raleigh with the full determination to use my utmost influence in behalf of bringing to the old people of North Carolina the full benefit of the Social Security Program. We have made every possible effort to do this without levying a land tax. We have proposed and fought for an increase in the income tax rate and of the franchise tax rate, in order to do this. Our efforts have been nullified by the forces that are in control in this General Assembly. With that situation facing me, I have either got to vote for this bill or say to the old people of North Carolina, who have given their lives to the upbuilding of this State, and who are now in their declining years and unable to support themselves, that I cannot help them. This I cannot do. I therefore vote "aye" on this bill.

TROY T. BARNES.

S. B. 58: I made a pledge to the people of my County that I would vote against any proposition in favor of putting a State tax on land. While I am heartily in favor of voting for a bill that will give to the aged and helpless in this State the fullest benefits of the National Social Security Program, I am going to vote for the Ward Substitute, which does not carry a land tax.

However, I am ready and willing, and I am going to do my utmost to bring the Revenue Bill back to the floor of the House, to the end that we may increase the income tax rate and the franchise tax rate on wealth in North Carolina sufficiently to bring in an additional two million dollars; which will give us the full benefit of the Social Security Program.

For the foregoing reason, and under the reservation herein made, I vote "aye" on the Ward Substitute.

TROY T. BARNES.

H. B. 32: With reference to H. B. 32, the Child Labor amendment, the President of the United States, who has done so much for our country wishes the passage of the Child Labor Amendment. In my opinion, the only safe way to regulate the labor of children in North Carolina is to have it done by the United States Congress, in order that one law will apply to all States alike.

I am vitally interested in the welfare of the youth of the State of North Carolina and of America, and I am in favor of doing everything in my power to help our great President in carrying out his great Program. I therefore take pleasure in voting "aye" to this bill.

TROY T. BARNES.

H. B. 20: This bill which passed February 1st, is not exactly as I should like to see it, but realizing the value of crop control legislation, and knowing the bill as now written is a great improvement over the original draft and goes a long way toward the elimination of the inequities existing under the old triple A, I take pleasure in voting for the bill. I offered the amendment hereinafter set forth for the purpose of protecting the small growers, and while this amendment was not adopted exactly as written, an amendment embodying the same features was adopted, and I think the farmers will be highly gratified with the provisions of the bill.

My amendment was as follows:

"Amend Section 5, paragraph (c) of the Committee Substitute for H. B. 20 by striking out that part of paragraph (c) in line 41 beginning with the word 'the' and ending in line 44 with the word 'county,' and insert in lieu thereof the following: 'The acreage quota for farms in a county shall not exceed such maximum percentage of the cultivated acreage as shall be fixed by the county committee as fair and reasonable for farms in such county. The maximum percentage so established by the county committee shall in no event exceed thirty-five per cent of the cultivated acres of a producer. The excess base acres involved by the application of the maximum percentage fixed by the county committee as herein provided shall be by the county committee distributed to the producers of such county in a manner that will tend to eliminate inequities and correct inequalities that might otherwise be caused by the provisions of paragraph (a) of Section 5 of this Act. The tobacco marketing quota of all farms affected by the provisions hereof shall be adjusted upward or downward, as the case may be, in order to carry out the intent and purpose of this section.'"

TROY T. BARNES.

STATEMENT BY MEMBER

As co-introducer of House Bill Number 280, which established maximum hours for labor, I regret that the bill was amended after its introduction to exempt so many employees from its protection. These amendments were inserted over my vigorous objection, and the act has but little resemblance to the bill as it was first presented.

The worst single feature of this act is that it does not apply to establishments with less than eight employees. This feature was forced in by amendment.

The best part of the act is the recognition of the right of workers to protection by the State against excessively long hours of work. This act should be considered something on which to stand and lift our labor standards higher, and as only the beginning of progress in this field. All exemptions must be removed.

Exemption of small homesteads from taxation, and laws to more adequately protect working people will be accomplished in the next few years. Because people are thinking—and progress follows thought as sure as dawn the darkness dispels.

APPENDIX

INAUGURAL MESSAGE
OF
GOVERNOR CLYDE R. HOEY
TO THE

GENERAL ASSEMBLY OF NORTH CAROLINA

January 7 1937

Mr. President, Mr. Speaker, Members of the General Assembly of North Carolina:

Government is the concern of all the people. In this modern day the affairs of State are intimately known and discussed by men, women and children in all walks of life. Interest in government in North Carolina is evidenced by the fact that out of a total population of three and a half million people—including all ages and all races—nearly 840,000 voted in the recent election. People have become government conscious in both state and nation, and intelligent participation in government by the masses of the people is the surest guaranty of the security of our rights, the preservation of our liberties and the proper administration of governmental functions, without prejudice and without favor.

Time marches on. There are many among us who have great difficulty in adjusting themselves to the changing conditions and especially to the changes in governmental processes and activities. We are continually harkening back to the past and recounting the policies of a former period and many times contrasting these with the extended and expanding governmental program of today—by way of voicing our disapproval. I can understand this situation and in a measure appreciate this viewpoint, and yet no one concerned with the progress of our civilization in the past fifty years, when travel, communication, transportation and our whole manner of living has been revolutionized would expect government to remain static. This is a changing world and growth and progress is the law of life. This applies to government as well as all other human activities.

Complaint is voiced against experiments in government. It is argued that change or uncertainties operate adversely upon business and general conditions. There is a measure of truth in that contention and yet, if that should be adopted as a fixed policy there would be no progress, no improvement, no advancement, and government would stand still while the procession of scientists, inventors, philosophers and teachers marched on. Government must keep pace with human progress to the end that business, industry and agriculture may be intelligently served, and that the prosperity of each may be placed upon a permanent basis of soundness and security, by increasing the intelligence, prosperity and well-being of all of our citizenship.

Experiments have marked the pathway of the world's progress. Thomas Jefferson and his co-laborers experimented with government and behold this Republic—the mightiest democracy of earth. Luther Burbank experimented

in plant life and more luscious fruit and lovely flowers filled the land. Thomas Edison experimented and the tallow candle and kerosene lamp gave way to the electric bulb, and the cities, towns and rural homes are lighted and this energizing power has lifted much of the world's drudgery from the backs of men and women. Scientists have experimented and we talk around the world instead of across the back fence, and we travel almost across the continent in the time formerly required to visit the county seat. Medical science experimented and life has been prolonged, contagious diseases conquered and epidemics almost eliminated. The luxuries of yesterday have become the necessities of today.

Government must keep pace with human progress and the spirit of humanity is finding universal expression in the functions now performed by the government which were formerly confined to benevolently inclined people, the church and religious organizations. Those who would serve the best today must have a civic conscience, must visualize the humanitarian needs, the claims of childhood and youth and lend a listening ear to the plaintive appeal of the prisoner in bonds the unfortunate and the underprivileged, the sick and afflicted, and the old and dependent. The public service cannot be improved or advanced by men of earth bound vision and atrophied imaginations. We can not return to other days. We are living in this day and the supreme test of the character of our government is the measure and quality of its service to the people.

Poverty Enemy of Progress

The greatest enemy of our progress in North Carolina is—poverty. In spite of the progress in North Carolina in this century we are still relatively poor. In population we are above the average among the sisterhood of states, while in the total of our income to individuals we rank only about one-half of the average. In 1934 only 33,000 North Carolinians paid federal income tax, whereas the national total was 4,000,000. In this state one in 100 paid income tax, and the average in the nation was one to 31. This means that we cannot spend like other states, and therefore, it is not quite fair to compare governmental expenditures in North Carolina by the average in the United States and condemn the State for its failure to measure up in this respect. The problem confronting North Carolina is to create new wealth from its own rich soil, develop its unmatched mineral resources, attract wealth from the outside in an increasing and expanding tourist trade and procure the location of industrial plants and business enterprises in the state. We must increase the income of our people on the farm, in the store, shop, office and factory as well as the school room and the trades. You cannot make a state prosperous on low wages and small income. I do not wish to see any business invited to North Carolina on the basis of cheap labor, but rather let us invite them to a state possessing unusual natural advantages, where business and industry shall be fairly treated, and where labor is not exploited, but is intelligent, efficient, dependable and willing to work. Every increase in wages is reflected in the added purchasing power of the people and every addition to the farmer's income increases his ability to buy. It is a source of gratification to note that so many industrial enterprises in the state have voluntarily increased salaries and wages during recent weeks. It is to be hoped that this policy will be adopted by all employers of labor and that other advances may be

made from time to time as the recovery of business progresses. Certainly the worker is entitled to a fair share of the profits of business and it is a good omen when employers recognize the justice of a fair and liberal policy in dealing with their employees, which makes for industrial peace and harmony, and the well being of the whole state.

I am intensely interested in the lot of the average man and sincerely concerned for his welfare and that of his family. I want to see him have a better chance in life. If he is a tenant the opportunity should be afforded for him to become a land-owner through his industry and sustained effort; if a worker in any field of activity, the chance to improve his condition and increase his compensation by its efficient and faithful service; and for the children of all classes the opportunity of an education in our public schools and full preparation for the duties and responsibilities of life.

Governmental Spending

There is a disposition in some quarters to measure governmental service by the amount of money expended. That is not an absolutely accurate standard and should not be accepted as the only criterion. We see it frequently stated that North Carolina expends less per child for education than other states. You cannot measure the educational opportunity provided for children by merely giving the figures representing the amount of money spent for education. Extravagant and unwise, and in many instances unnecessary, expenditures are made in many states in connection with the educational system—the very nature of the work invites extravagant and impractical spending. There are so many things for which money may be spent, but much fewer things for which it must be spent in order to meet the absolute needs in both education and government. It should be remembered that economy in government is still a virtue and the most destructive force in government or education is unbridled extravagance. The state ought not to deal penuriously with its citizenship and it must make substantial progress and go forward sanely, but it must not forget that there is no virtue in spending unless a hundred cents in value is obtained for every dollar expended and unless the investment is necessary in order to serve the needs of the people of the state.

It can be said truthfully that North Carolina has maintained its government upon a basis of strict economy and unquestioned integrity, and yet it is revealing to note the increase in expenditures since the beginning of this century. During the first year of Governor Aycock's administration, 35 years ago, the total expenditure by the state for all purposes was a million and a quarter dollars. Last year the expenditures of the state reached the high total of \$60,646,422. Naturally the tremendous increase arises because of the support of schools and roads by the state. In 1901 the state contributed \$200,000 to the public school system and now it pays \$21,000,000. Then no appropriation was made for roads and now all the roads are built and maintained by the state. All institutions have been enlarged and increased, others established in new fields of service, new state agencies have been created and others broadened and extended, and the state has pre-empted many fields of activity formerly belonging to the counties.

There has been an unmistakable trend toward state control and state responsibility during a period of years, but the change in the last seven years has been most striking. As an evidence of the shifting of the burden

of government as between the state and counties and municipalities, it is interesting to note that in 1931 the total revenues raised and expended by the state amounted to \$36,776,964, while the counties, municipalities and special districts expended \$65,354,302. Last year the State expended \$60,646,422, and the counties, municipalities and special districts had their tax burden reduced to \$35,571,031. Of this sum \$21,000,000 was for debt service, which is a diminishing obligation. The counties have been relieved of everything except the obligation to provide for the poor, conduct their courts, co-operate with the state and federal government in public health, welfare and demonstration work and provide for debt service. The state has remitted to the counties and municipal governments the exclusive right to levy ad valorem taxes on property during the last quadrennium.

Taxation

The power to tax is stil the power to destroy. It should be the contrast purpose of an enlightened state to study to improve its system of taxation, to eliminate injustice and to distribute equitably and fairly the burdens and benefits of government.

There are two considerations to be observed in levying taxes—first, who pays the tax, and second, who gets the benefits. Both of these should be properly considered in levying tribute upon the citizen. The state has heretofore voluntarily relinquished its right to levy taxes upon property, and hence has been restricted to income, inheritance, license, special and sales taxes. The problem of finding sufficient revenue to meet the imperative needs of an expanding state program will require the best brains and the most industrious efforts of this entire Assembly. I know you will approach this task with the sole purpose of doing justice to every person and interest. In the pursuit of revenue North Carolina shall not go upon any punitive expedition against any class of our citizenship and, if additional taxes are necessary to be levied, the state should do so to meet the pressing needs and not by way of punishment of anybody.

There has been much discussion of the sales tax. I know of the general opposition to it and it would be a source of genuine satisfaction to me if it could be repealed, but after canvassing the whole tax situation thoroughly, I regret to say that I cannot recommend this course, if we are to maintain and efficient public service, for the simple reason that the necessary revenue cannot be otherwise provided at this time. I do recommend the exemption from the sales tax on the basic necessities of life, including meals at hotels and restaurants and the removal of discriminations. I believe a better enforcement would result in less unfair competition among merchants. The merchant who deals fairly with the state and his customers in connection with the sales tax ought to have protection from the merchant who does not. The state is going to see that the sales tax is collected from all and thus place all merchants on the same footing. This does not imply that the state is not already doing well in the collection of this tax, for more than one-third of the revenue, exclusive of road funds, arises from this source, and it was collected last year for less than two cents on the tax dollar. However, it is generally conceded that many loopholes now exist for evad-

ing the payment of this tax and, with the addition of more auditors and a better check-up and some necessary changes, increased revenue will be realized.

At an early date I will transmit to you the report of the Budget Commission containing very full and well considered recommendations, at which time I will make more specific suggestions to you with reference to the revenue measure.

There is one thing of paramount importance in connection with the adoption of a revenue measure—that the receipts shall equal the expenditures—that the budget shall be balanced. The federal government has unlimited credit, hence it is not so imperative that Congress immediately balance its budget. This does not apply to a state. An unbalanced budget is disastrous to the state—its credit suffers immediately, interest rates advance and financial embarrassment follows quickly. North Carolina's credit is good; she has never defaulted in any obligations and her bonds sell above par, even at a low rate of interest. We must maintain this fine record.

Constitutional Amendments

Contrary to past experience, the five constitutional amendments were approved by the voters in the last election and this confers additional powers upon the General Assembly. The adoption of these amendments was an expression of confidence in the legislative branch of government, and I have no doubt that you will fully justify that confidence by prudently and wisely exercising these added powers.

The authority to increase the membership of the Supreme Court should be promptly exercised because the need is imperative and the instruction was unequivocal. There seems to be universal recognition of the wisdom of this action.

The other four amendments deal with our tax system and should be studied with care and made effective in such manner as not to unduly disturb the economic balance of either the state, county or municipalities, or make it oppressive upon any class of our citizenship. The proponents of the homestead exemption amendment wisely indicated that they would not ask for it to be made fully effective immediately, but realized the necessity of a gradual application of the exemptions, beginning with a small amount and increasing it as conditions will justify, so that county and municipal finances will not be seriously or adversely affected.

The amendment authorizing the classification of property is most vital and should not be acted upon hastily or without the fullest investigation. Unless you find it possible to make a thorough investigation and obtain all the facts necessary to justify you in formulating a definite policy that will be fair to the tax payers to be affected and not injurious to either the state, counties or municipalities, I would recommend that you authorize the appointment of a Commission to study the question and submit the facts, data and recommendations to the next General Assembly. This is embarking upon a new policy and it should not be adopted without proper study and consideration, for the success of the plan will depend upon the fairness and completeness of any plan adopted, both with reference to the tax-pay-

ers affected directly by the classification and those not included in the groups, but who may be vitally concerned in the shifting burdens of taxation.

The income tax and debt limitation amendments will require your careful consideration and wise application. The adoption of these four amendments should enable the General Assembly to develop a more equitable tax system, but it will require an intelligent and unbiased approach to the whole tax question with the thought of raising the necessary revenue and making a wise and equitable distribution of the tax burden.

Education

The consummate task confronting the people of North Carolina is the proper education of all the children. The state has largely assumed this responsibility which was formerly shared by the counties and other lesser governmental units. We now maintain an eight months' school term in every district and I look forward confidently to the time when North Carolina will provide an uniform nine-months term for the whole state, but that cannot be realized now.

But what of the immediate objectives in education? I am definitely in favor of retrieving our lost ground, continuing the process of restoration of salaries of teachers to the former level and increasing the facilities of our public school system, including the encouragement of public libraries in every county, until adequate opportunities shall be provided for childhood. I believe we should begin the policy of inaugurating twelve grades instead of eleven, which will serve the double purpose of increasing the opportunities of all the children and giving them more thorough preparation. A standard comparable to our sister states must be maintained. I know it all costs money, and we must proceed sanely, but North Carolina is too poor not to educate, and we must not fail to meet the situation adequately.

We furnish free tuition, we require the children to attend school, and we transport them to school in large numbers—and yet many of them are without the necessary school books. I believe the state should complete its service by furnishing free school books. The rental system has been helpful, but I recommend that provision be made for free textbooks for all the elementary grades beginning with the fall sessions of 1937 and that the rental system be continued for the high schools until one or two years later. I think the present rental system covering supplemental books, which obtains in a few of the counties in the elementary grades, might properly be continued and extended to as many others as desire this service. The furnishing of free school books will relieve parents of a heavy burden and will greatly increase the efficiency of the school and give to every child an equal opportunity in public school system, better denominated the university of all the people.

North Carolina is becoming more educationally minded. Our people are looking to you with confidence for an advance step in education. The child must be our first concern. We believe in our educational system, but we also believe that it can be improved. It needs money, but it needs more than money. Less than ten per cent of our children go to college, so the public school is the finishing school for ninety per cent. This being true, the cur-

ricula should minister to the needs of this vast majority and make a real effort to prepare them for the duties of life as fully as it prepares the smaller number for further scholastic training. I would not have less cultural training provided, but more practical, and the practical given the same dignity as the purely cultural studies.

The vocational courses ought to be available in our high schools. The agricultural courses have already accomplished remarkable results. Home economics is now receiving attention somewhat commensurate with its importance, but ought to be in every school. Another course in building, comparable to the agricultural course and embracing architecture, carpentry, brick-laying and all character of construction, would help to round out and complete the education and preparation for skilled workers. These are merely suggestions. We must educate, train and equip people to work with their hands. Today there is demand everywhere for trained people—brick-masons, mechanics, builders and all kinds of skilled labor. The federal government has been assisting in vocational training in our public schools and the appropriations this year will be greatly increased. Heretofore the local schools have been matching the federal funds and consequently the benefits have been limited to such schools as could provide the money. I believe the state should co-operate with the local schools in giving some reasonable assistance so that the increased federal appropriation can be obtained. The federal funds this school year amount to \$303,932, whereas, next year it will be more than double, amounting to \$739,230.

I offer no criticism of our public school set-up, but it occurs to me that some unification should be effected so that the local authorities would not have to apply to so many different agencies in order to get a determination of their local problems. I think the School Commission has performed a valuable service and should be continued. The Board of Education, composed of the constitutional state officials, could not devote the time and attention necessary to assure a strict business administration of the school finances, which is highly essential, but if a closer relation was effected between the Department of Education and the School Commission, I feel that less irritation and annoyance would be experienced by the school officials generally, and some duplication of activities could be eliminated. I cannot escape the conclusion that the State Superintendent of Public Instruction should be the real head of the whole public school system, but the good offices of the Commission should be retained with full power to safeguard the school funds by a wise and business-like apportionment and expenditure of the school appropriation. In education, as in all other governmental activities, there should be checks and balances.

The whole state feels a pardonable pride in our Greater University of North Carolina and other splendid educational institutions. Without discussing these in detail I bespeak your favorable consideration of their needs. We cannot content ourselves merely with provision for the public schools. If we are to have an educated people, who shall be able to meet the high exception of those who believe in North Carolina and her future, we must make adequate provision for our institutions of higher learning. They carry the torch of educational progress—and we follow in the light of their leadership!

The Highway System

The road system of North Carolina is a source of pride and satisfaction to the people of the state. Few states have such a complete system and one which so nearly meets the needs of every section. The building of hard-surfaced or permanent roads has so far progressed that practically every county site or principal town in the state is connected by a dependable highway. Since the state has taken over the maintenance of all public roads, great progress has been made in providing all the year round secondary roads. North Carolina stands almost alone in the service which she renders the people of the state in the matter of providing and maintaining all highways, thus relieving the counties of all expense in connection with this important phase of governmental service. In the beginning of this century the state did not spend any money on public roads, the whole burden resting upon the counties, and we had no road system. The transition has been complete so that the state now bears all the expense, with the aid of the federal government, and we are developing a great highway system.

Roads affect the people so vitally that they feel a lively interest in every phase of road service. Without disparaging any of the fine things already accomplished, I believe that it is possible to make still further improvements. In order to more adequately serve all the people, I think increased attention should be given to the secondary or county roads, so that these roads may be still further improved and maintained in passable condition all the year round. These are the roads of all the people and the main highways are not available to a large proportion of our population until they have first travelled these county or secondary roads to reach the leading highways.

Another matter of vital concern to the farmers of the state is that some provision should be made in the building of highways through fields and farms to take care of the accumulated water and not empty it in such volume as to seriously wash and damage the land. This is a serious problem in many sections and a constant source of damage to the land-owners and to farmers.

In order to secure the united support of all the people of our highway program, it is not alone essential that there shall be a fair distribution of road money and benefits in every section of the state, but the people of all sections shall feel that they are getting a fair allotment, and that no section is being neglected. With the view of bringing the highway system into a more intimate relationship with the needs of the State, I recommended that the Highway and Public Works Commission be composed of ten members, including the chairman. I do not favor the appointment of the members of this commission upon the basis of the location of the several Congressional Districts. Neither do I favor the creation of the impression that our road system is a sectional or local function of government. Our road system is a state system, but must be administered with a fair and just regard to local needs. To that end, I recommend that the state be divided into nine administrative road districts best adapted to the most effective utilization of all the local forces and factors essential to the complete possible development of a well knit state system of public highway. It is my

matured judgment that this change will make for the efficient and satisfactory service of this important state agency and will afford the people of each district a reasonable representative to whom they can carry their road problems for investigation and adjustment.

The last General Assembly made a substantial reduction in the price of automobile license tags and this reduction has not adversely affected the road revenue. I recommend that you make a still further reduction in the price of these tags, which will afford much needed relief to the motorists without unduly impairing the road fund.

The expenditures from the road fund have been heavy during the past year and these expenditures must continue throughout the New Year in order to rehabilitate our roads and protect the heavy investment which the state has made in them. I shall insist that the road funds should be preserved and used for the purpose for which these taxes have been levied and the revenues collected, with no diversion of this money except such amount as will be justified by the sales tax levy, as previously authorized.

The Hazard of the Road

We read the daily record of injury and death on our highways and we stand appalled in the presence of the slaughter of human lives. The story so often says it was an unavoidable accident. That is not enough. Most of these accidents could have been avoided if somebody had exercised the proper care. It is not always the driver's fault, and frequently the accident was unavoidable so far as he was concerned, but there must be borne in upon the consciousness of the whole people the imperative obligation to exercise care. It is gratifying to know that the percentage of fatalities has been reduced in the state last year, but the fact remains that approximately 1,021 were killed and more thousands injured on our highways in the year just ended.

What can be done about it? It is a matter of the gravest concern of all and I believe if all the people get sufficiently interested that they can do something about it. I think we should crusade for safety on our roads. It is not enough to hold a few conferences and have some general discussion, as helpful as that may be, but we should so arouse public sentiment that it will aid the officers in enforcing the laws for the protection of travellers on our highways and so impress the reckless or careless driver that he will feel the weight of disapproval of other travellers regardless of whether an accident results from his reckless or careless conduct. Public sentiment is powerful and, if the press would lead and all civic and religious organizations give their hearty support and encouragement, I believe we can reduce the hazards of travel. In this beginning of the New Year I call upon the State Highway Patrol and all law enforcement agencies, as well as the people of North Carolina as a whole, and all who use our highways, to join in a determined effort to make the highways safe for everybody and to greatly reduce the fatalities and injuries this year.

Labor Legislation

I recommend that we take a forward step in labor legislation in North Carolina. We have been standing still in this respect for many years and

the time has come for us to enact laws in harmony with the civic conscience and economic thought of the nation. We have no regulation at all as to hours for males over 16 years of age. For women in manufacturing establishments we have a 11-hour day and 55-hour week.

The experiment with N. R. A. demonstrated the practicability of reducing the hours of labor in industry and business for all classes of workers—men and women—and although the measure was declared unconstitutional it should be said to the everlasting credit of our employers generally that an overwhelming percentage continue to observe its provisions as to hours of labor, minimum wage scale, and child labor. I am tremendously concerned that we shall keep fully abreast with the most forward looking States in providing wholesome and healthy working conditions and that the hours of labor shall be in harmony with the best standards and the wages commensurate with the ability of the industry or business to pay. Some industries and some business establishments take advantage of the necessities of the people and work them excessive hours for wholly insufficient compensation and some mercantile establishments most able to pay are chief among the offenders. These practices are oppressive and unjust to labor and constitute unfair competition with other industries and business concerns who are complying with the higher standards and paying decent wages. It is the province of law to require all to live up to the minimum standards which the great majority have willingly adopted.

The chief desire of the laboring people of North Carolina is steady employment with reasonable hours and fair compensation. Reasonable and prudent regulations will aid materially in reducing unemployment and stabilizing business and furnishing the basis for continuing the fine relationship now existing between employers and employees in this State. If we do not wish the Federal government to regulate all of our internal affairs, we should assume that duty and responsibility for ourselves.

Reapportionment of Representation

North Carolina is one governmental unit. There should be such unity in the state that we would never be thinking in terms of sections, but of the whole. One way to reach this end is a common understanding and common desire to treat each section fairly in all governmental activities. There has been much discussion of the failure of the General Assembly at its previous sessions, to carry into effect the constitutional requirements with reference to reapportioning representation according to population following the 1930 census. I am sure this was occasioned more by neglect than from design, but I strongly recommend that this constitutional mandate be put into effect at this session. The Federal Government re-apportioned in accordance with the Constitutional provision, and the 1930 census, with the result that some states gained and others lost in representation. The fact that re-apportionment has been delayed unduly by the state makes it all the more imperative that action be taken now without waiting for another census. The evident fairness of such a course must be apparent to all, and it would be a very gracious thing if the measure should be passed with practical unanimity.

Agricultural Problems

North Carolina is pre-eminently interested in agriculture. More than half of our whole population is directly engaged in farming and continue to reside upon the farm, while practically every business and interest in the State is responsive to the changing economic condition of the farmer. For the first time in history the government has been making a serious and determined effort to place agriculture on a parity with industry, and the State and Federal agencies combining to serve the farmer. I wish to see the closest possible co-operation of all these agencies and the full co-ordination of intelligent service so that the full benefits will be realized by the individual farmer—the small ones as well as those more fortunately circumstanced.

Our state ranks high in the production of many staple or basic crops and recent years have witnessed a greater diversification, which has been both profitable to the farmer and beneficial to the land, in that it has afforded an opportunity to enrich the soil and make it more productive. We still major in tobacco and cotton and occupy a predominating position with reference to the former. We have the distinction of producing more cotton per acre than any state in the union.

Our farmers are tremendously interested in legislation looking to the control of production and such other regulation as will insure a reasonable price for their products and safe-guard them from the disaster of a flooded market and destructive price levels. Their salvation lies in the early adoption of a compact bill, similar to that already passed in Virginia and which will be adopted in South Carolina and Georgia—all dependent upon our participation. I recommend the early passage of the necessary legislation so that North Carolina may lead the way and the other states may comply early enough to limit the spring plantings. Regulation and control represent the difference between profit and loss, poverty and plenty, for the tobacco farmer.

I am looking forward to a great agricultural program in North Carolina with a long range vision of the future. I visualize a State enriched by the industry and intelligence of her young men and women, schooled in the knowledge of the chemistry of the soil, who shall demonstrate the ability of our people to grow the food supplies for which we now send away around one hundred million dollars annually, to move our smoke houses from the middle west to the fields of Carolina, so well adapted to the growing of grasses and legumes; to see our granaries filled with the products of our own soil and every farm house a base of supplies for the whole year round; the tenant problem practically solved; the 2000 deaths a year from pellagra prevented; the health and happiness of our people advance, and the farming industry stabilized and made dependably prosperous.

Develop the State

I believe in North Carolina—in her resources, her potential possibilities, her hidden and revealed wealth, her glorious history, her independence and

self-reliance, and above all, her unconquered spirit. She has lived with poverty; she understands self-denial; she has endured hardships and privations and she knows how to abound.

We must lay a broad foundation for developing this whole State. Her agricultural future challenges the interest and attention of all who are capable of envisioning the possibilities of a state whose soil has been enriched by the use of lime, the growing of legumes, the diversification of crops, the saving of lands from erosion, the multiplication of food crops and the complete provision for a thorough Live-at-Home program on every farm.

The mineral wealth of the State is more diversified than that of any State in the union and should be discovered, developed and utilized to the enrichment of our mountain section especially, and the whole State in general.

The State needs advertising—not the spasmodic, flamboyant, high-powered, super-salesmanship type, but intelligent, persistent, well considered and properly directed efforts to present the resources, attractions and undeveloped opportunities in North Carolina for investors and home-seekers. The tide is moving in this direction. Not the floating population, but farmers, business men, workers and those who have become acquainted with our section through the increasing number of tourists who are visiting this State. The number will be greatly augmented with the completion of the nation-famed scenic highway, which will traverse North Carolina for 240 miles, and all the other inviting highways and means afforded for visiting and enjoying the unusual attractions in every section of the State.

I think we might well consider a national exposition for North Carolina in 1938 to last for several months—similar to the one held last year in Texas—and invite the world to visit North Carolina.

The Liquor Question

I am not a fanatic on the liquor question, but I continue to regard liquor as Public Enemy Number 1. I have not changed either my opinion or position on this question, and I do not believe any solution has been found for this vexed problem. Personally, I cannot subscribe to the doctrine that the way to advance the cause of temperance and decrease drinking is to provide all the liquor you want and make it easily obtainable and readily accessible. This theory is contradicted by all human experience. May I humbly offer this observation: You will never build either a great state or a great county upon profits derived from the sale of liquor.

The evils of liquor being admitted, the practical question confronting you is: What should be done about it? I shall transmit to you the very intelligent and comprehensive report of the Commission charged with the responsibility of making an investigation of the facts. I bespeak for it your careful study.

It seems to me that our own past history clearly points the way for a proper determination of this question without regard to anybody's personal opinion or conviction. In 1908 the State voted against the manufacture and sale of liquor by 44,000 majority. In 1933 the State voted against the

repeal of the Eighteenth Amendment by 185,000 majority. With these facts before us I do not believe the General Assembly would be justified in annulling the vote of the people by a legislative enactment. I do not pretend to know the will of North Carolina upon the liquor question at this time, but I do stand for the right of the people to express their will. It would do violence to democratic principles to abrogate a law established by a vote of the people of the whole State until another opportunity is given for a full and fair expression of public opinion at the ballot box.

These are my views. I gladly accord to each of you the right to entertain and express yours with the same freedom which I have exercised, and I assure you in advance of my utmost respect.

Social Security

The public mind has been much confused regarding the benefits and operation of the Social Security legislation. The measure which you enacted at the special session was a compliance of the State with the Federal statute making provision for unemployment and old age pensions for workers in the designated occupations and when eight are so employed in one establishment. This whole plan is financed by the employers and employees and neither the State nor Federal government makes any contribution to this fund. The unemployment benefits under this act, do not begin until 1938 and the old age pensions until 1942.

The remainder of the Social Security program is denominated as public assistance and is given free to the recipients by the national government in conjunction with the state and county, and will become available immediately upon the passage of the act by your body.

This consists of assistance to all old people over 65 years of age who are in need, to the blind and to dependent children. The maximum amount allowed by the Federal government is \$15.00 per month for each old person, provided a similar sum is furnished by the State and county. Generous provision is made for the blind, the government furnishes one-half of the sum awarded. Dependent children are assisted to the extent of one-third of the total, the county and state providing the remaining two-thirds.

I recommend the passage of an act fully complying with the Federal statute and making it possible for all of our needy old people and the other classes affected to share in the bounty of the nation to the extent of their need and in harmony with the benefits now being realized by the citizens of other states. I think the law should provide for classification according to the needs in each case, for it is quite manifest that the state cannot and ought not to provide the maximum in all cases. Whatever sum is provided should be borne jointly by the state and county, and local agencies should be utilized in determining the need and passing upon all applications, with state supervision.

I regard the adoption of the whole social security program as the most forward and advanced step in this generation and the most humane enactment of any legislative body in all the history of the nation. It is inspirational to consider a great nation and other co-operating units of governmental joining hands in helping the old and needy, the blind and helpless,

and the under-privileged and dependent children. It is worthy of a great humanitarian people and it speaks the language of broad benevolence and high spiritual concepts.

This General Assembly may be fruitful in legislative service and make many worth-while enactments, but I predict today that your outstanding achievement will be the social security legislation, and you will be longest remembered for the help given to childhood and old age—opportunity to the one and security to the other—thus enabling the children to grow into useful service and the old people to approach the golden glow of an evening sunset with a sense of satisfaction and security which fate and fortune had denied them.

Humanitarian Service

The length of this message forbids even a reference to many matters which I shall leave for future discussion. It would be most pleasing to mention every institution and department of government in which decided advancement has been made along humanitarian lines and especially our fine public health department. The increased service of the welfare department and the splendid results already achieved give evidence of the greater progress awaiting us in this fruitful field, and I hope to see the State broaden its base and give added assistance to some counties unable to carry on a proper program.

The 9000 persons in the prison camps and penitentiary, are objects of my interest and yours. They are not all bad, and many are not bad at all, and among them are an increasing number of young boys. I am happy for all the humanitarian measures which have been put into effect, and I heartily applaud every effort to help them. I heartily commend the modern parole system which has been established, and is being so intelligently administered. The State owes the high obligation of restoring these people to society, when the period of servitude has been completed, better than when they were received into the custody of the State. The plans already in contemplation should be put into effect by which the youthful prisoners will be segregated from the old offenders, with the daring purpose of rescuing them from a life of crime. More extensive efforts must be made to teach the prisoners some trade or work by which they can earn a livelihood and at the same time serve the state profitably during the period of confinement. There is no more important work than the reclamation of human character, and no higher service to society than the rehabilitation of the prisoners when released by the state.

Our charitable institutions are crowded and overflowing. Appeals are coming in from hundreds who are seeking admittance but cannot be received because of insufficient room and limited maintenance funds. I trust you will look into the pressing needs of these various institutions and decide upon some definite course of action to make provision for those who should be admitted to these institutions and are entitled to receive the treatment which they can provide.

Conclusion

I come humbly to the acceptance of the responsibilities of the high office of Governor of this great commonwealth. It shall be my constant pur-

pose to share with you, gentlemen of the General Assembly, the privilege of serving the whole people of this State. I am no less concerned than you over the problems which are peculiarly yours. I know most of you personally and I believe in you, in your intelligence and patriotism, and I confidently expect a session of marked public service.

I know that I voice your sentiment when the hope is expressed that you will apply yourselves diligently to the task in hand, and to the serious problems confronting you, with the definite purpose of completing your labors and closing the session within a reasonable time. This course would impress most favorably the people of the State, and furnish plenary evidence of your efficiency and capacity. Delay does not offer solution of vexed problems and I have faith to believe that you will courageously face and determine according to your own judgment the important matters requiring your attention.

I look forward with interest to the administration of government in North Carolina in full co-operation with our national government and its agencies which are contributing to the well-being of all the people, to the end that this state may share fully in the benefits of the policies adopted for the nation.

I covet for our beloved State harmony, peace and good will among all classes of our people and mutual confidence and respect for each other. We cannot build a great commonwealth by encouraging discontent and fostering strife, by arousing bitterness and nurturing hatreds, by creating diversions and sponsoring antagonisms. There is room in North Carolina for all shades of opinion and all schools of thought and for a free and full expression of views. We should develop a broad spirit of tolerance for those who differ with us and seek to understand their viewpoint.

This period of change and transition has not affected the fundamentals of life. The stately steppings of time only reveal more clearly the everlasting things that matter to a State or an individual. The mammon in life and the metallics in government cannot compare with the altruistic principals which are permeating both in this new day and higher endeavor in public service. The framers of our State Constitution understood this spirit when they declared that "religion, morality and knowledge" are "necessary to good government and the happiness of mankind."

I summon all the men, women and children of North Carolina to unite in the common purpose of making your State and mine a better place to live.
